Re: Water Right Application No. G2-28506

Hello,

I'm writing to ask for your help on a project. A number of people from Sequim and Port Angeles who helped develop the Elwha-Dungeness Watershed Plan are working on accomplishing the goals of the plan. As part of this, we need to estimate future water demand for the Dungeness watershed. A piece of this estimate will be based on the applications for water rights currently on file with the Department of Ecology.

You are receiving this letter with the return envelope and form because you have an application pending with Ecology for water from the Dungeness area.

Because a number of things may have changed since you filed your application, we'd like to hear from you. Plans may be different, property may have been sold, or you might have acquired water through other means.

Is your application still accurate? Your answer will help us more realistically estimate the amount of water that's being requested.

Action required on the enclosed form:

Please indicate if you still need water for your project.
If yes, your application will remain on file with Ecology. **OR**

If you do not need the water, please check that box and I can pass the information to staff in Ecology's Water Resources Program. **AND**

If you no longer own the property, please provide contact information for the new owner.

PLEASE NOTE

Ecology is not taking action on pending applications for water rights at this time.

Action will be taken after a Dungeness instream flow and water management rule has been adopted and enough information is available to make decisions.

The Dungeness rule is currently being discussed, and formal review of a draft rule is planned for late this summer. A public workshop is being held at the John Wayne marina in Sequim, from 4 to 7 p.m. on March 26th. We'll be talking about elements of the rule and options for water management. There will also be an announcement in the Sequim Gazette.

Ecology contact information

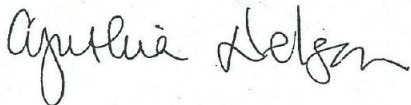

If you have questions about this request or are interested in the discussions on water supply and rule development, you can contact me at the Shorelands and Environmental Assistance Program, Southwest Regional Office of Ecology. My phone number is (360) 407-0276.

You can also call Sarah Ferguson of the Water Resources Program, who is working on the Dungeness rule, at (360) 407-6780.

Information on Dungeness rulemaking is on-line at:
<http://www.ecy.wa.gov/programs/wr/instream-flows/dungeness/html>.

General information regarding watershed planning is available on Ecology's website at:
<http://www.ecy.wa.gov/watershed/index.html>.

Thank you for your time and attention.

Cynthia Nelson
Watershed Lead for Elwha Dungeness Watershed Planning
Shorelands and Environmental Assistance Program, Southwest Region

Enclosures: Return envelope and form

Jeannette: I wish I didn't have to leave.
 This has been very informational.
 Thank you!

Watershed Informational Survey
 East Olympic Water Quality Management Area

Gathering public input on water quality issues is the first step in preparation of the June, 1998 Needs Assessment for the Eastern Olympic Water Quality Management Area. Your input will help Ecology set priorities for focusing its resources in this basin.

recal program - will Ant more of this in the creeks + streams than do functioning septic systems! (less the pressurized systems)

1. What are the greatest challenges to water quality in this basin?

Having enough people (staff) to enforce existing regulations (Critical Areas Ordinance, clearing + grading, TFW, etc.)

2. What "beneficial uses" of water (e.g., shellfish harvesting, drinking water, etc.) are at risk?

SHELLFISH HARVESTING. SHELLFISH are more fragile than other beneficial uses. Need to keep enough water in the river for the fish.

3. What, if any, additional measures or approaches are needed to improve and protect water quality and the related plant and animal resources in the basin?

See #1. Implement the watershed plans.

4. Are you aware of any water quality improvement projects in your area (e.g., watershed plans, farm plans, restoration activities, stewardship initiatives)?

If so, which ones? YES. Dungeness River Watershed Plan, Sequim Bay Watershed Plan, Dungeness-Puillene Regional

What has worked well to improve water quality in this basin? Would you like to see it replicated?

See ABOVE.

5. Where (geographically and activity-wise) should Ecology be spending its time and money in the basin to improve water quality?

Ecology should work on determining whether OR NOT to issue the pending water rights permits, AND should leave more of the quality issues to local government.

Please bring your thoughts on these questions to the meeting on August 7, 1997. You may also return your answers and suggestions to: Jeannette Barreca, Department of Ecology, PO Box 47775, Olympia, WA 98504-7775. For further information Jeannette can be reached at: (360) 407-6556, e-mail: jbar461@ecy.wa.gov

Dear Mr. and Mrs. Glover:

Re: Ground Water Application No. G 2-28506

We acknowledge receipt of your affidavit of publication of notice in connection with the above-numbered application.

The water codes require that no action be taken toward issuance of a permit earlier than thirty (30) days after the last date of publication. This period of time is allowed for filing any protests or objections.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

Sincerely,

Sheri Fox
Water Resources

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY
NOTICE OF APPLICATION
TO APPROPRIATE
PUBLIC WATERS
TAKE NOTICE:
That Clarence and Marguerite
Glover of Sequim, Wash. on
June 8, 1992 under Applica-
tion No. G2-28506 filed for
permit to appropriate public
waters, subject to existing
rights, from a well in the
amount of 15 gal. per minute
as needed year round each
year, for single domestic irri-
gation during irrigation season.
The source of the proposed
appropriation is located within
SE 1/4 SW 1/4 of Section 7
Township 30 N., Range 3W
W.M., in Clallam County.
Protests or objections to ap-
proval of this application must
include a detailed statement of
the basis for objections; pro-
tests must be accompanied by
a two dollar (\$2.00) recording
fee and filed with the Dept. of
Ecology, at the address shown
below, within thirty (30) days
from July 23, 1992.

Re: Ground Water Application No. G 2-28506

Dear Mr. and Mrs. Glover:

On June 22, 1992, this office sent a notice to you for publication in a newspaper within Clallam County.

We have not received the necessary Affidavit of Publication and, therefore, cannot continue to process your application.

Please reply within thirty (30) days or, if you are no longer interested in the application or obtaining a water right, please sign the statement below and return to this office.

I am no longer interested in processing the Ground Water Application No. G 2-28506 or obtaining a water right and I hereby agree to it being cancelled.

I understand that after the effective date of cancellation, any withdrawal of ground water exceeding 5000 gallons a day and irrigation of more than one-half acre is a violation in accordance with Chapters 90.03 and 90.44 RCW and is subject to enforcement action.

Signature

Sincerely,

Sheri Fox

Re: Ground Water Application No. G 2-28506

Dear Mr. and Mrs. Glover:

Your application for the appropriation of water has been assigned the above-referenced number. Please refer to this number in future correspondence.

Enclosed is a notice of your application which must be published once a week for two consecutive weeks in a qualified legal newspaper of general circulation in the County or Counties in which the storage, diversion, and use is to be made and in other newspapers as directed. A list of these newspapers in your county is enclosed. The applicant is responsible for the payment of the publication.

Please read the notice carefully to make sure it is correct. Should you find an error, please return the notice to our office for correction.

You should mail or deliver the enclosed notice to a newspaper regarding publication as soon as possible. When you receive the affidavit of publication from the newspaper, please forward it to this office promptly.

Sincerely,

Sheri Fox
Water Resources
